 - Learned & Built React Native mobile apps for upwork clients
- Coruscate Solutions Pvt. Ltd.** *May 2020 - Mar 2021*
11 months
React Native Developer
 - Worked on DiamNow product to manage diamond inventories in React.js
 - Worked on Healthcare product called Writu in React.js
- DhiWise (Pivoted from Coruscate)** *Apr 2021 - Oct 2024*
3 Years 7 Months
Engineering Manager

My time at DhiWise has been real pivot in my career where I learned a lot building product and how it was different working at product based startup as compared to service based companies.

Mainly spent my entire time at DhiWise in **code generation**.

 - Lead team of 8 developers
 - Worked on automating admin panel generation from your swagger/OpenAPI docs in react
 - Worked on Figma to React+tailwind code generation
 - Also, Worked on Figma to Next.js / HTML+CSS / React Native+StyleSheet code generation / Shopify

Then OpenAI enters the market with ChatGPT+OpenAI API

 - Worked on VSCode extension which integrates API from postman collection into your codebase using your own coding standards.
 - Built Figma conversion to your existing codebase leveraging pre built components
 - Built Custom solution for an enterprise customer where they could convert their figma components into their own codebase leveraging pre built components.
- IndieHacker Journey** *Nov 2024 - present*
CXO (I handle everything)
 - Built <https://alltheaitools.com> and <https://findsaastools.com> directories to learn SEO.
 - Had Built and launched [FlexApp](#)(Now shut down). It was Rork/Bloom competitor in the past to build mobile apps from idea.
 - Got Selected in [Hacker Residency](#) to build extend FlexApp but this time for both web and mobile apps with native DB/Auth integration with Supabase.
 - Built [vibe coding web app](#) like lovable that builds full stack web and mobile apps with supabase and had MCP integrations support
 - Built [Vibe Coding desktop app](#) that builds full stack web and mobile apps by leveraging existing claude code subscription with electron.js using claude-agent-sdk.
 - Built [GenDesigns](#) that generates mobile app UI prototypes on canvas
 - Currently [playing with openclaw](#)
